tain, had it the same power. No one objects to diversified industry in a country adapted to various pursuits; but to endeavor to force industry prematurely in a direction that it does not and the rest to New Mexico, Deseret, and Jacinto. industry prematurely in a direction that it does not naturally seek is unwise. I have no doubt but that The territory proposed for Jacinto includes the disthe less restrictions we place upon foreign commerce the more extended and profitable that commerce would be: but it would be a natural extension, and, whether much or little, it would most conduce to public wealth and happiness. In process of time, this will undoubtedly become a great manufacturing nation, but agriculture must ever precede manufac-

Wealth is more diffused in this country than in any other: let it be our policy to perpetuate this wide distribution. I doubt not the good intentions of many who desire to "encourage and protect," as they term it, "the industry of the people," but their judg-ment I very much question. To tax the consumption of the people, with a view to protect their labor, is a fallacy that will subject us to the ridicule of those who will write our history, whatever may be thought of the theory now.

I have, so far, in this article, simply attempted to show the absurdity of that part of the report of the Secretary in which he endeavors to prove that a nation which produces annually the least wealth is the two personages whose names, even among the list of most wealthy. Merely stating the Secretary's argu-ment is sufficient to show its absurdity. It is evident and bid fair to defy all the buffetings of change and that he did not understand what he was at when he of time. penned this part of the report. It is also evident that

the city of Mexico to the 1st, and the Jalapa Zempoalteca to the 4th instant, three days later intelligence than we published yesterday.

The latter paper states that private letters had been received in Jalapa, announcing that on the 30th ult. a revolutionary movement was to have taken place, but it was providentially nipped in the bud by the authorities. It appears that a number of disaffection men, and among others two editors of the Eco del Commercio, had leagued together to procure the repeal of an obnoxious law, called the law of Oero, passed 21st June, 1848, and in a tumult they were to get up a kink of Monarchico-Santanist revolution. The plot was discovered to the Governor by some of the National Guard, whom the chiefs of the movement had endeavored to seduce. The Vera Cruz papers, singularly enough, remain quite silent on the subject, but it is well known that the revolutionists have been baulked in their scheme, and will probably be punished.

Another abortive attempt at a pronunciamento was lately made at Puebla. The plot turned out a failure, through the non-arrival of \$4000, which had been promised to feed the embrio insurrection. The in surgents were all ready, but they would not move without the sinews of war, and so, after waiting for the money until 11 o'clock at night, they dispersed The commandment, Gen. THE SLAVERY QUESTION IN OHIO .- The following is the resolution adopted by the late Democratic Con-

CALIFORNIA AND THE PROPOSED NEW TERRITORIES. Mr. Foore's bill, to be introduced into the Senate. for the organization of the new territories, contains puted territory between the State of Texas and the Republic of Mexico, or that barren country lying west of the Nueces, and east of the Rio del Norte. This disputed country contains 100,000 square miles, or about one-fourth of the whole territory of the deg. 30 min., and connects the territory of New Mexico with that of Texas, as Deseret connects New Mexico with California. The geographical position of each division may be described as follows:

Smuggling in Russin. The following statements of smuggling, derived from reliable source, will serve to illustrate the influence of high or prohibitory tariffs on the manners and morals of a people :

The line of frontier between Prussia and Russia is becoming the seat of a formidable system of smuggling, carried on by armed bands of men, who, in some cases, after escorting their wagons to points within the Russian territory, have made their retreat with such military precision and order, that it is be-State. The entire region lies south of the points 36 lieved they must have turned the discipline acquired in the Prussian army to good account. The border country may be described as in a perpetual state of war, and that of the worst kind; the Russian preventive corps have the severest instructions, and carry them out in the severest manner: but the smugglers are often more numerous and quite as well trained, 225,000 and know the ground perfectly, and thus set them at 70.000 defiance. Unfortunately, another "border" practice has lately become more frequent—the smuggler bands have become robbers. One of them, headed by a man named Krotinus, is now notorious; it has lundered the houses of several of the richer Russian andowners on the frontier, returning across the line into Prussia to spend the proceeds. A party of this band recently passed the day at a village wine-house, and were called out towards evening by a man who proved to be the captain himself, "for duty;" he was most particular in inquiring whether his men had behaved respectably and paid for every thing!

BY HENRY ALFORD. The dead alone are great! While heavenly plants abide on earth, The soil is one of dewless dearth; But when they die, a mourning shower Comes down and makes their memories flower With odors sweet, tho' late.

The dead alone are fair : While they are with us strange lines play Before our eyes and chase away God's light: but let them pale and die And swell the stores of memory,-There is no envy there. The dead alone are dear!

While they are here, long shadows fall From our own forms and darken all: But when they leave us, all the shade Is round our own sad footsteps made, And they are bright and clear.

The dead alone are blest! While they are here clouds mar the day, And bitter snowfalls nip their May; But when their tempest time is done, The light and heart of Heaven's own sun Broods on their land of rest.

COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA and CONSUMPTION.

The uniform success which has attended the use of this preparation—its salutary effect—its power to relieve and cure affections of the Lungs, have gained for it a celebrity equalled by no other medicine. We offer it to the afflicted with entire confidence in its virtues, and the full belief that it will subdue and remove the severest attacks of disease upon the throat and Lungs. These results, as they become publicly known, very naturally attract the attention of medical men and philanthropists everywhere. What is their opinion of Cherry Peotoral may be seen in the following :-

Prof. Surgery Med. College, New York, says:—
"It gives me pleasure to certify the value and efficacy of Ayer's CHERRY PECTORAL, which I consider peculiarly adapted to cure diseases of the Throat and Lungs."

The Rt. Rev. Bishop Field
writes in a letter to his friend, who was fast sinking under an
affection of the Lungs:—"Try the CHERRY PECTORAL and if
any medicine can give you relief, with the blessing of God of Louisiana, writes "That a young daughter of his was cured of several severe attacks of Croup by the "CHERRY

PECTORAL. The Canadian Journal of Medical Science states. "That Asthma and Bronchitis so prevalent in this in-

CHERRY PECTORAL, and we cannot too strongly recommend this skillfull preparation to the Profession and public generally."

Description of the Profession and public generally. The profession and public generally are profession and public generally. The profession and public generally are profession and profession are profession and public generally are profession and profession are profession and profession Let the relieved sufferer speak for himself:— HARTFORD, Jan. 26, 1847.

Dr. J. C. Ayer-Dear Sir:-Having been rescued from a painful and dangerous disease by your medicine, gratitude prompts me to send you this acknowledgement, not only in ustice to you, but for the information of others in like affiic-

A slight cold upon the lungs, neglected at first, became so severe that spitting of blood, a violent cough and profuse night sweats followed and fastened upon me. I became emaciated, could not sleep, was distressed by my cough, and a pain through my chest, and in short had all the alarming symtoms of quick consumption. No medicine seemed at all to reach my case, until I providentially tried your CHERRY PECTORAL, which soon relieved and now has cured my.

Yours with respect,

ALBANY, N. Y., April 17, 1848.

Dr. Ayer, Lowell—Dear Sir:—I have for years been afflicted with Asthma in the worst form; so that I have been obliged to sleep in my chair for a larger part of the time, be-

ted with Asthma in the worst form; so that I have been obliged to sleep in my chair for a larger part of the time, being unable to breathe on my bed. I had tried a great many medicines to no purpose, until my Physicians prescribed, as an experiment, your Cherry Petroral.

At first it seemed to make me worse, but in less than a week I began to experience the most gratifying relief from its use; and now, in four weeks the disease is entirely removed. I can sleep on my bed with comfort, and enjoy a state of health which I had never expected to enjoy.
